In principle, original articles should be organized into the following sections: (1) cover page; (2) abstract; (3) Main text (Introduction, Materials and Methods, Results, Discussion, and Conclusion); (4) References; and (5) Figure and table captions. Page numbering should start with the cover page. In principle, manuscripts, such as reviews or case reports, other than original articles should be organized in the same format as that of original articles.
2. Manuscript sections
 - 1) Title: The title should concisely describe the contents of the manuscript. The subtitle should also clearly describe the contents, and should not consist of only numbers.
 - 2) Introduction: The introduction should clearly describe the background, novelty, purpose, and significance of the study.
 - 3) Materials and Methods: This section should provide detailed information on the materials, equipment, or methods used along with clear instructions so that the experiments can be reproduced by others. Parameter settings, number of specimens, extraction methods, statistics processing, and others should comply with the purpose of the study.
 - 4) Results: This section should simply present the findings without bias or interpretation. Measurement results should show characteristic values including mean values and standard deviations.
 - 5) Discussion: This section should carefully consider the materials and methods, results, and others referring to relevant literature. Please note that it should not be overly assertive and should avoid off-topic points. The discussion should stay focused on the study purpose and not digress into a general discussion.
 - 6) Conclusion: The section should precisely summarize the results obtained and relate them to the purpose of the study and hypothesis as presented in the Introduction.
3. Manuscripts should be prepared using A4-size paper. The suggested length of each typed page is 80 alphanumeric characters per line \times 25 lines per page using a 12-point font. Top/bottom/left/right margins should be approximately 25 mm. Non-Japanese names and places should be in their original names..
4. For the manuscript style, refer to the latest issue of the journal.
